About

I'm a 23-year-old developer originally from Argentina, now embracing the tech atmosphere in Vilnius, Lithuania, where I've settled with a residence permit. Known for my passion for quick learning and a professional drive, I thrive in the world of web development, particularly skilled in React, Node, and PostgreSQL. Additionally, I bring a unique background as an electromechanical technician, adding a diverse range of technical expertise as well as discipline and responsibility to my work.

Experience

Developer

-Find me a home | 4-months

Full stack app developed under SCRUM methodology. Its objective is to give the user information about pets available for adoption and an easier way to contact the shelters. It also has a pet-oriented ecommerce
